

Daston is an Information Technology services company providing a wide range of technology and business management solutions to commercial and government clients.

Daston was founded in 1992 and is headquartered in Northern Virginia. A woman-owned small business (WOSB) and an ISO 9001:2008 certified company, Daston has gained a reputation for superior customer service and high-quality solutions tailored to our clients' specific needs. With an outstanding record of repeat business and referrals, a highly qualified team, and a growing portfolio of best-of-breed technology partners, Daston delivers the experience, innovation and results our clients need to refine processes and optimize technology.

### Evolving to Meet Your Needs

Daston's original line of business supported the commercial telecommunications industry. In 2000, we broadened our scope to provide IT services to the federal government. We quickly captured application engineering work with the U.S. Army, which later grew to a large-scale IT infrastructure engineering and support effort.

In 2002, we added financial management and business consulting capabilities and continued to grow and serve other federal agencies both directly and through large systems integrators. In 2005, added Software as a Service (SaaS) solutions to our portfolio development around NetSuite and Google Apps Premier in the commercial space, and are

to meet the government's increasing demand for cloud computing solutions.

Today our clients include the Defense Information Systems Agency (DISA), Air Force, Army, GSA, DEA, FinCEN, Homeland Security, NASA, Veterans Administration (VA), Transportation, Treasury, as well as several state and municipal governments and numerous commercial clients.

### Simplifying Government Procurement

Daston prides itself on being easy to work with. We hold both facility and personnel security clearances and we offer numerous contract vehicles to expedite purchasing and save our clients time and money. Prime contracts include:

- GSA IT Schedule 70
- GSA Financial and Business Solutions (FABS)
- GSA Mission Oriented Business Integrated Services (MOBIS)
- GSA 8(a) Streamlined Technology Acquisition Resources for Services (STARS) and STARS II
- GSA COMMITS/NexGen
- NIH Chief information Office - Solutions and Partners 2 (CIO-SP2)

In addition, we are partnered on other GWAC and agency-specific contracts including ITES-2S, ENCORE II, and GSA Alliant Large and GSA Alliant Small Business; and hold several state contracts.
