Daston Partners With kloudtrack®

Governance, Risk Management and Compliance Technologies for Business Process Management and Human Interaction Workflow Now Available Through Daston

MCLEAN, VA - August 24, 2010 - Daston Corporation, a leading provider of customized Software-as-a-Service and Cloud (SaaS|Cloud) computing technology solutions, today announced a partnership with kloudtrack®, a Software-as-a-Service solutions company offering Governance, Risk Management and Compliance (GRC) technologies for Business Process Management and Human Interaction workflow. kloudtrack® integrates best-practices management with audit-trails that place a premium on monitoring users, data, transparency and collaborative processes.

Under the terms of the agreement, Daston will serve as a public sector reseller and implementation partner for kloudtrack®. The kloudtrack® technology platform provides a Cloud 2.0® framework for deploying sophisticated data management, business process utilities and legacy IT integration within organizations of all sizes. kloudtrack® can be utilized for deployments that are organization-wide, departmental or involving third-party data stakeholders. Designed modularly the kloudtrack® SaaS|Cloud application modules are able to store, retrieve, automate, control, track and report on business and work flow process as well as monitor the cross-roads where individuals interact with sensitive information.

“We are pleased to add kloudtrack solution suite to our growing portfolio of cloud computing technologies,” said Michael Pait, Senior Vice President of Business Development at Daston. “Through our partnership with kloudtrack, we are now able to offer our clients document processing, storage, business process flows, and compliance capabilities via a new economic model and powered by cloud technology.”

In addition to reselling kloudtrack technology, Daston will also provide a broad range of implementation services. Daston’s certified IT professionals have been serving the needs of federal and local governments for more than 18 years. The company launched its Software-As-A-Service

business practice in 2005. For more information on Daston's SaaS|Cloud solutions, contact Michael Pait, Senior Vice President of Business Development, (703) 962-8085; michael.pait@daston.com; or visit Daston at www.daston.com.

About kloudtrack®

[kloudtrack®](#) offers simple, yet powerful and affordable, hosted Software-as-a-Service and Cloud (SaaS|Cloud) computing governance, risk management and compliance (GRC) technologies. kloudtrack® is one of the first technology and solution providers to address specific international, federal, state and industry-imposed regulatory compliance standards in SaaS|Cloud environments across multiple vertical industry sectors. This understanding and integration of GRC factors truly sets kloudtrack® technologies, solutions and intellectual property apart in the market.

kloudtrack® is a Chesapeake Innovation Center (CIC) portfolio-company and was recently selected by Microsoft® Corporation for its Startup Accelerator Program - an initiative that highlights companies developing unique and innovative technologies on Microsoft platforms.
